

New state-of-the-art workholding technology

Kurt® Workholding's DX6® CrossOver® vise combines features of their renowned Kurt Vises with advanced workholding technology, enhancing precision and performance, especially in flatness and parallelism. It now includes a cast stationary jaw for reduced deflection and increased stability during clamping.

1

Features the same bed height and keyway to the stationary jaw face as the D688.

2

A redesigned nut with lighter weight.

3

A new brush seal design.

4

Bearing pack is larger, stronger, and more durable.

5

Creates all-directional alignment and reduces jaw lift for improved performance.
